Limited Lifetime Warranty

The following statement is intended to confirm and clarify the limited lifetime warranty for the integrated ABB interferometer.

Delta Instruments B.V. uses of ABB interferometers as one of the main parts for the following milk analysers that operate with Fourier Transform Infrared techniques:

- CombiScope FTIR 300 HP
- CombiScope FTIR 600 HP
- CombiScope FTIR A600 HP

The integrated ABB interferometer has a limited lifetime warranty against moisture degradation on the non-hygroscopic optics and on the scanning mechanism.

Also, the integrated ABB interferometer has a limited lifetime warranty of the scanning mechanism, all moving components and the motor of the scanning mechanism of the interferometer. This warranty **does not** cover the optical components (corner cube and beam splitter) of the interferometer and their alignment.

This warranty becomes void if the interferometer is mishandled, altered, abused or misused.
